DEEPAK PATEL CHITYALA

Chityaladeepak96@gmail.com | (317) 970-5271 | https://www.linkedin.com/in/dchityal/

PROFESSIONAL SUMMARY

Health Informatics and Data Analytics professional with over 5 years of experience specializing in medical coding, EHR optimization, and healthcare reporting. Skilled in Tableau, SQL, and Python to create interactive dashboards, automate reporting, and improve coding accuracy, reimbursement rates, and regulatory compliance. Proficient in CPT, ICD-10-CM, HCPCS, and HEDIS standards, with expertise across Epic, Cerner, and Dentrix Ascend to drive efficient and data-driven decision-making.

TECHNICAL SKILLS

Languages:	SQL, Python, R, SAS.
Databases:	MySQL, SQL Server, MS Access, Web of Science.
Medical Coding:	CPT, ICD-10-CM, CDT, HCPCS.
Visualization:	Tableau, Microsoft Power BI, Excel.
Electronic Health Records:	Epic, Cerner, Dentrix Ascend, e-Clinical Networks, Open MRS, Librehealth, REDCap.
Scientific Terminology:	HIPAA, HL7, SNOMED, LOINC, XML, UML, HEDIS, Telemedicine.

PROFESSIONAL EXPERIENCE

EHR Coding Compliance Analyst **Aug 2024-Present**
Dr. Baig Dental Group *Lansing, MI*

- Managed patient EHRs and insurance claims in **Dentrix Ascend**; reduced coding and claims errors through **CDT/ICD-10 validation.**
- Developed **Tableau dashboards** for claims denial trends and reimbursement performance, integrating payer-specific rules for Medicare/Medicaid.
- Participated in **the analysis, design, implementation, and optimization** of EHR application systems; supported upgrades, troubleshooting, and enhancements to improve clinical workflows and user experience.
- Generated monthly data reports for **Medicare, Medicaid, and Delta Dental of Michigan,** measuring SLA Adherence, tracking trends, and identifying areas for improvement in claim processing and data accuracy.
- Analyzed claims data to detect denial or underpayment patterns, collaborating with billing teams to ensure timely resubmissions and appeals.
- Created **Tableau heat maps** to visualize coding error hotspots by provider, specialty, and payer, enabling targeted training for coders and reducing repeat errors.
- Developed automated coding accuracy scorecards by linking **CPT/HCPCS** data with payer reimbursement outcomes, improving compliance monitoring.
- Built interactive **Tableau dashboards** that combined claim status, reimbursement rates, and coding compliance metrics, supporting executive decision-making.

Clinical Data Reporting Analyst **Aug 2023- Jul 2024**
Indiana University School of Medicine (IUSM) *Indianapolis, IN*

- Collaborated with multidisciplinary clinical teams to investigate the role of **T-follicular regulatory cells** in food allergies and airway inflammation models, integrating research data with clinical documentation standards.
- Utilized advanced Excel functions (**Power Query, XLOOKUP, Pivot Tables**) and complex formulas to streamline data analysis and support evidence-based decisions.
- Designed **Tableau dashboards** to visualize gene expression patterns, mapping results with relevant **ICD-10-CM** codes for disease classification and reporting.
- Leveraged Excel and SQL to **Extract, Transform, and Load (ETL)** large-scale RNA genomic sequence datasets, ensuring alignment with standardized clinical terminologies (**LOINC, SNOMED**).
- Utilized MySQL to manage and preprocess efficiently datasets encompassing over 14,000 genes, reducing processing time and improving data quality.
- Conducted data cleaning, transformation, and normalization using Excel and SQL, achieving a 20% reduction in dataset errors.
- Utilized Python libraries (**Matplotlib, Pandas, Pyplot**) to construct visualizations, including Venn diagrams illustrating common genes shared across cell types.
- Created **Tableau trend reports** linking genomic findings with associated diagnostic codes to support translational research and grant reporting.
- Achieved a 95% accuracy rate in identifying common genes across three T-follicular cells (HDM, PCT, and Naive), with findings cross-referenced against applicable **medical coding standards** for clinical relevance.

HIM Coding Specialist **Jan 2022- Jul 2023**
Indiana University *Indianapolis, IN*

- Developed automated SQL scripts to extract EMR and billing data, mapping **CPT, ICD-10-CM, and HCPCS** codes for **CMS/HEDIS** compliance.
- Built advanced SQL queries with joins, subqueries, and CTEs to extract and validate compliance datasets from **Epic, Cerner, billing, and operational systems**.
- Streamlined data cleansing, transformation, and coding validation processes to deliver **consistent, audit-ready outputs** for compliance teams.
- Designed **real-time Tableau dashboards** to monitor turnaround times, denied claims, SLA compliance, and performance guarantees.
- Integrated **DAX measures** and automated compliance alerts into dashboards, enabling early identification of non-compliance and risk thresholds.
- Utilized **Direct Query** and scheduled refreshes to maintain live Tableau reporting without manual intervention.
- Created Tableau drill-down reports linking claim denials to specific **CPT/ICD-10-CM** codes, improving root-cause analysis and corrective actions.

Healthcare Reporting Analyst **Apr 2020- Nov 2021**
Malla Reddy Super Specialty Hospitals *Hyderabad, India*

- Collaborated with healthcare providers to interpret medical terminology, procedures, and treatments and ensure accurate clinical documentation in EHR systems.
- Detected and investigated fraudulent insurance claims, reducing financial losses by 15% and improving claim processing efficiency by 20%.
- Audited patient records for **CPT/ICD-10-CM coding accuracy**, decreasing claim rejections by 30% and improving reimbursement timelines.
- Utilized **Tableau to create reports** on claim denial trends, coding accuracy rates, and financial impact, enabling data-driven corrective actions.
- Optimized EHR workflows to reduce patient record errors by 30% and improve coding compliance.
- Built **interactive Tableau dashboards** linking procedure volumes, coding patterns, and payer reimbursement trends to identify revenue improvement opportunities.
- Developed **automated reports in Tableau and SQL** to monitor CPT/ICD-10 coding trends and highlight discrepancies for clinical and billing teams.
- Analyzed coding and procedure data to provide **Tableau-based visual insights** for improving documentation accuracy, compliance, and operational efficiency.

EDUCATION

Indiana University Indianapolis (IUI) | *Master of Science in Health Informatics* *Indianapolis, IN* | **Dec 2023**
Coursework: Clinical Information Systems, Data Analytics, Data Management, Electronic Health Records

DR.NTR University of Health Sciences | *Bachelor of Science in Dental Surgery* *Hyderabad, India* **| Apr 2020**
Coursework: Clinical Research, Dentistry, Clinical trials, General Surgery, Internal Medicine, Epidemiology
